

# METER CALIBRATIONS

## BENEFITS OF ROUTINE METER INSPECTIONS AND CALIBRATIONS

Banlaw offer a complete specialised Diesel Meter Calibration System with air elimination to ensure you have total confidence and accuracy in your fuel management practices.

### HOW METER CALIBRATIONS CAN DELIVER COST SAVINGS TO YOUR COMPANY:

- ▶ Improving flow meter accuracy improves the value of your Fuel Management data and all of the opportunities it supports, including maximising your Fuel Tax Credit and providing high quality consumption data into your fleet maintenance regime.
- ▶ Identifying a fault within the metering system before failure enables preventative maintenance and avoids the high costs of downtime and breakdown repairs. Timely maintenance will also maximise the service life of metering system components reducing future capital expenditure.
- ▶ An accurate flow meter allows you to confirm that you are getting what you paid for. Routine maintenance and calibration gives you confidence that your meter is performing as intended.
- ▶ Improved metering accuracy provides enhanced means by which any fuel "loss" can be identified, whether it is theft or leakage. Timely identification of fuel leakage in turn helps prevent costly environmental incidents.

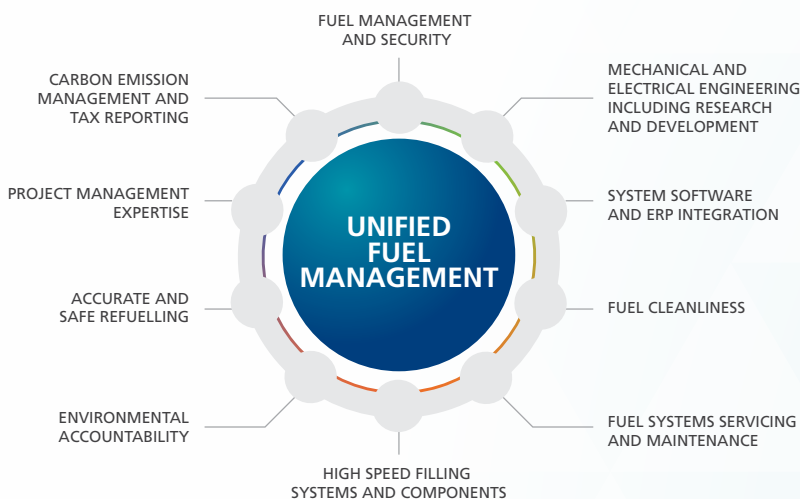

Additionally, the meter calibration process can deliver valuable feedback on the general condition of your metering system and its constituent components. These include identification of abnormalities and defects, inspection and advice for serviceable items and verification that each component within the system is capable and rated for the the process conditions and application in which it is used.

### FUEL MANAGEMENT SYSTEMS AND FUEL TAX CREDITS

Banlaw FuelTrack™ provides a convenient, accurate, cost effective and practical means by which to prepare supporting data for a Tax Credit claim and with the rates for credits regularly changing, maintaining accurate, auditable, time stamped records of how you consumed your fuel is now more important than ever.

Here's how Banlaw FuelTrack™ will help you:

1. The convenience, ease, timeliness and cost effectiveness of producing Fueltrack reports which directly support the Tax Credit claim.
2. The accurate means by which fuel is reconciled allows the claimant to maximise their benefit.
3. Traceability and reconciliation are key benefits of Fueltrack whether for in house fleet maintenance and accounting purposes or in the event of an ATO audit.

# INTEGRATED HYDROCARBON MANAGEMENT SYSTEMS

Banlaw can provide you with innovative, integrated and secure refuelling and hydrocarbon management systems to help you to control costs and ensure fuel security.

We are an Australian company with more than 30 years experience in the design, manufacture and implementation of world class hydrocarbon management systems for the mining, rail, fleet and port industries. We currently export to 25 countries.

Banlaw's highly skilled staff has a reputation for technical expertise and a total commitment to quality and service. A focus on research, development and quality ensures we provide systems and products to the highest standard. Our Quality Assurance System is accredited by SAI Global. AS/NZS ISO 9001.

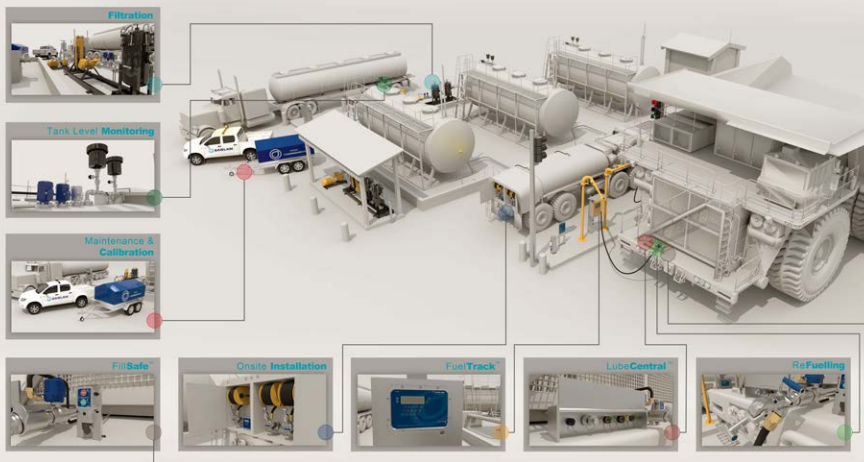

## WHY BANLAW

Banlaw has the people, products and services to manage all your refuelling and hydrocarbon management needs.

- ▶ Globally recognised with the best technology and patented systems
- ▶ Built for tough operating conditions
- ▶ Customised, integrated systems and components
- ▶ Innovative R&D program
- ▶ Complete range of services and ongoing support

## CAPABILITIES

- ▶ Audit services
- ▶ Consulting services
- ▶ Customised refuelling systems
- ▶ Customised hydrocarbon management systems
- ▶ Refuelling components
- ▶ Customised monitoring and reporting systems
- ▶ Ongoing technical support
- ▶ Maintenance services
- ▶ Refuelling facilities management
- ▶ Project management
- ▶ Meter calibrations

## MORE INFORMATION

To find out how Banlaw can help you to better manage your refuelling systems and control one of your major costs phone +61 2 4922 6300, visit [banlaw.com](http://banlaw.com) or see your local authorised Banlaw representative.
